

## GlobalSeaweedSTAR Capacity Building Fund Completion Report

### Awardee Details

<b>Grant reference ID</b>	GSS/CBF/014
<b>Full name/title</b>	Dr. Cicilia Selviane Boneke Kambey
<b>Position held</b>	Researcher/ECR
<b>Organisation</b>	University of Malaya

### Details of Capacity-Building Activity

<b>Name of activity</b>	7 <sup>th</sup> Conference of the International Society for Applied Phycology (ISAP 2021) in the Special Session Seaweed Biosecurity – Developing a Progressive Management Pathway for the Seaweed Industry (a virtual conference)
<b>Date held</b>	14 May – 13 August 2021
<b>Organiser/provider</b>	International Society for Applied Phycology

### Biography

I am Cicilia S.B. Kambey, currently as a researcher in the Institute of Ocean and Earth Sciences, University of Malaya Kuala Lumpur, Malaysia. I am part of Early Career Researcher (ECR) for

Global project of GlobalSeaweedSTAR from 2018 to 2021. My research interest is biology oceanography which seaweed aquaculture as the most attractive components and drives more interesting attention in the coastal oceanography point of view. Based on that particular point, my study start to observe seaweed and its aquaculture industry. My study focus in seaweed ecophysiology to climate change and its mitigation, seaweed modelling in IMTA system to evaluate the excess of nutrient in the system, disease management in aquaculture industry which refer to concept of biosecurity, and policy implementation which is important to frame the seaweed aquaculture in the national and international level. However, I feel that my experience and my knowledge still need to be developed and strengthen with many more studies and observations in this field as well as collaboration partnership with other researchers. Hopefully, I can continue to work in this seaweed aquaculture industry.

### **Report on Capacity-Building Activity**

I am grateful to participate this event with help of GlobalSeaweedSTAR Travel Grant. Through this event, I can learn how to deal with the best way as presenter of a scientific research in the big forum and share my knowledge on it. The link to know with other participant and the same research interest in this event, also valuable for me. The GlobalSeaweed STAR has helped me a lot. I was happy with my experience in ISAP and Global Seaweed STAR to GSSTAR
